COMMUNICATIONS SEGMENT

The Communications segment provides wireless and wireline telecom and broadband services to consumers located in the U.S. and businesses globally. The Communications segment contains three reporting units: Mobility, Business Wireline, and Consumer Wireline.

Results have been recast to refine the allocation of shared infrastructure costs between the Communications segment and Corporate and Other.

Discussion and Reconciliation of Non-GAAP Measures for Continuing Operations

We believe the following measures are relevant and useful information to investors as they are part of AT&T's internal management reporting and planning processes and are important metrics that management uses to evaluate the operating performance of AT&T and its segments. Management also uses these measures as a method of comparing performance with that of many of our competitors. These measures should be considered in addition to, but not as a substitute for, other measures of financial performance reported in accordance with U.S. generally accepted accounting principles (GAAP).

On April 8, 2022, we completed the previously announced separation of our WarnerMedia business. With the separation and distribution, the WarnerMedia business met the criteria for discontinued operations in the second quarter of 2022. For discontinued operations, we evaluated transactions that were components of AT&T's single plan of a strategic shift, including dispositions that may not have individually met the criteria due to materiality, and have determined discontinued operations to be comprised of WarnerMedia, Vrio, Xandr and Playdemic Ltd. (Playdemic). These businesses are reflected in our historical financial statements as discontinued operations, including for periods prior to the consummation of the WarnerMedia/Discovery transaction. The information below refers only to our continuing operations and does not include discussion of balances or activity of WarnerMedia, Vrio, Xandr and Playdemic.

Free Cash Flow

Free cash flow is defined as cash from operations and cash distributions from DIRECTV classified as investing activities minus capital expenditures and cash paid for vendor financing (classified as financing activities). Free cash flow after dividends is defined as cash from operations and cash distributions from DIRECTV, minus capital expenditures, cash paid for vendor financing and dividends on common and preferred shares. Free cash flow dividend payout ratio is defined as the percentage of dividends paid on common and preferred shares to free cash flow. We believe these metrics provide useful information to our investors because management views free cash flow as an important indicator of how much cash is generated by routine business operations, including capital expenditures and vendor financing, and from our continued economic interest in the U.S. video operations as part of our DIRECTV equity method investment, and makes decisions based on it. Management also views free cash flow as a measure of cash available to pay debt and return cash to shareowners.

¹ Includes distributions from DIRECTV of \$392 in the third quarter and \$1,429 in the first nine months of 2022.

² For Standalone free cash flow see Exhibit 99.4.

Cash Paid for Capital Investment

In connection with capital improvements, we negotiate with some of our vendors to obtain favorable payment terms of 120 days or more, referred to as vendor financing, which are excluded from capital expenditures and reported in accordance with GAAP as financing activities. We present an additional view of cash paid for capital investment to provide investors with a comprehensive view of cash used to invest in our networks, product developments and support systems.

| Cash | Paid for | Capital Investr | nent | | | |
|----------------------------------|----------|-----------------|---------|----|--------------|----------|
| Dollars in millions | | | | | | |

| Cash paid for vendor financing | | (900) | (1,019) | | (4,237) | (4,013) |
| Cash paid for Capital Investment | \$ | (6,821) \$ | (5,489) | \$ | (19,634) \$ | (16,064) |

EBITDA

Our calculation of EBITDA, as presented, may differ from similarly titled measures reported by other companies. For AT&T, EBITDA excludes other income (expense) – net, and equity in net income (loss) of affiliates, as these do not reflect the operating results of our subscriber base or operations that are not under our control. Equity in net income (loss) of affiliates represents the proportionate share of the net income (loss) of affiliates in which we exercise significant influence, but do not control. Because we do not control these entities, management excludes these results when evaluating the performance of our primary operations. EBITDA also excludes interest expense and the provision for income taxes. Excluding these items eliminates the expenses associated with our capital and tax structures. Finally, EBITDA excludes depreciation and amortization in order to eliminate the impact of capital investments. EBITDA does not give effect to cash used for debt service requirements and thus does not reflect available funds for distributions, reinvestment or other discretionary uses. EBITDA is not presented as an alternative measure of operating results or cash flows from operations, as determined in accordance with GAAP.

EBITDA service margin is calculated as EBITDA divided by service revenues.

These measures are used by management as a gauge of our success in acquiring, retaining and servicing subscribers because we believe these measures reflect AT&T's ability to generate and grow subscriber revenues while providing a high level of customer service in a cost-effective manner. Management also uses these measures as a method of comparing cash generation potential with that of many of its competitors. The financial and operating metrics which affect EBITDA include the key revenue and expense drivers for which management is responsible and upon which we evaluate performance.

We believe EBITDA Service Margin (EBITDA as a percentage of service revenues) to be a more relevant measure than EBITDA Margin (EBITDA as a percentage of total revenue) for our Mobility business unit operating margin. We also use wireless service revenues to calculate margin to facilitate comparison, both internally and externally with our wireless competitors, as they calculate their margins using wireless service revenues as well.

There are material limitations to using these non-GAAP financial measures. EBITDA, EBITDA margin and EBITDA service margin, as we have defined them, may not be comparable to similarly titled measures reported by other companies. Furthermore, these performance measures do not take into account certain significant items, including depreciation and amortization, interest expense, tax expense and equity in net income (loss) of affiliates. For market comparability, management analyzes performance measures that are similar in nature to EBITDA as we present it, and considering the economic effect of the excluded expense items independently as well as in connection with its analysis of net income as calculated in accordance with GAAP. EBITDA, EBITDA margin and EBITDA service margin should be considered in addition to, but not as a substitute for, other measures of financial performance reported in accordance with GAAP.

Adjusting Items

Adjusting items include revenues and costs we consider non-operational in nature, including items arising from asset acquisitions or dispositions. We also adjust for net actuarial gains or losses associated with our pension and postemployment benefit plans due to the often-significant impact on our results (we immediately recognize this gain or loss in the income statement, pursuant to our accounting policy for the recognition of actuarial gains and losses). Consequently, our adjusted results reflect an expected return on plan assets rather than the actual return on plan assets, as included in the GAAP measure of income. Prior periods have been recast for consistency to include gains on benefit-related and other cost investments.

The tax impact of adjusting items is calculated using the effective tax rate during the quarter except for adjustments that, given their magnitude, can drive a change in the effective tax rate, in these cases we use the actual tax expense or combined marginal rate of approximately 25%.

Adjusted Operating Income, Adjusted Operating Income Margin, Adjusted EBITDA, Adjusted EBITDA margin, Adjusted EBITDA service margin and Adjusted diluted EPS are non-GAAP financial measures calculated by excluding from operating revenues, operating expenses and income tax expense, certain significant items that are non-operational or non-recurring in nature, including dispositions and merger integration and transaction costs, actuarial gains and losses, significant abandonments and impairment, benefit-related gains and losses, employee separation and other material gains and losses. Management believes that these measures provide relevant and useful information to investors and other users of our financial data in evaluating the effectiveness of our operations and underlying business trends.

Adjusted Operating Revenues, Adjusted Operating Income, Adjusted Operating Income Margin, Adjusted EBITDA, Adjusted EBITDA margin, Adjusted EBITDA service margin and Adjusted diluted EPS should be considered in addition to, but not as a substitute for, other measures of financial performance reported in accordance with GAAP. AT&T's calculation of Adjusted items, as presented, may differ from similarly titled measures reported by other companies.

Includes adjustments for actuarial gains or losses associated with our pension and postretirement benefit plans, which we immediately recognize in the income statement, pursuant to our accounting policy for the recognition of actuarial gains/losses. We recorded total net actuarial gains of \$1.4 billion in the third quarter of 2022. As a result, adjusted EPS reflects an expected return on plan assets of \$0.8 billion (based on an average expected return on plan assets of 6.75% for our pension trust and 4.50% for our VEBA trusts), rather than the actual return on plan assets of \$(3.4) billion (actual pension return of -15.4% and VEBA return of -12.2%), included in the GAAP measure of income. Adjustments also include the impact to our third-quarter 2022 benefit expense accruals that resulted from the prior-quarters 2022 remeasurements of plan assets and obligations, which included increases in the assumed discount rates.

As of January 1, 2022, we adopted, through retrospective application, Accounting Standards Update (ASU) No. 2020-06, which requires that instruments which may be settled in cash or stock to be presumed settled in stock in calculating diluted EPS. While our intent is to settle the Mobility II preferred interests in cash, the ability to settle this instrument in AT&T shares will result in additional dilutive impact, the magnitude of which is influenced by the fair value of the Mobility II preferred interests and the average AT&T common stock price during the reporting period, which could vary from period-to-period. For these reasons, we have excluded the impact of ASU 2020-06 from our adjusted EPS calculation. The per share impact of ASU 2020-06 was to decrease reported diluted EPS \$0.02 and \$0.01 for the quarters ended September 30, 2022 and 2021, and \$0.05 and \$0.03 for the nine months ended September 30, 2022 and 2021, respectively.

³ See Exhibit 99.4 for reconciliation of Standalone AT&T Adjusted EPS.

Net Debt to Adjusted EBITDA

Net Debt to EBITDA ratios are non-GAAP financial measures frequently used by investors and credit rating agencies and management believes these measures provide relevant and useful information to investors and other users of our financial data. Our Net Debt to Adjusted EBITDA ratio is calculated by dividing the Net Debt by the sum of the most recent four quarters Adjusted EBITDA. Net Debt is calculated by subtracting cash and cash equivalents and certificates of deposit and time deposits that are greater than 90 days, from the sum of debt maturing within one year and long-term debt.
